Re: Building Restoration
Contractor Recommendation

Dear Nassar:

This is to inform you that I have worked with Jim Murphy, President of Pro-Tec Building Restoration Services for over 18 years on projects of varied magnitude, including Annunciation Church in Paramus, NJ and Our Lady of Mount Carmel Church in Ridgewood, NJ. During that time I found it a pleasure and an honor to add my voice to the many Architects and Contractors who have come to know and respect Jim Murphy for his honesty, integrity and caring professionalism.

Jim's knowledge and experience with all aspects of the mandatory operations required to restore buildings and make them safe, has always been a cost and time saving contribution to the efforts of all team members. Unforeseen technical issues, so common to the building restoration industry, complicated or mundane, are resolved without rancor or delay.

I believe that Pro-Tec Building Restoration Services would be a strong and competitive organization that should be added to your approved list of Contractors. Therefore, without hesitation, I recommend their services to the needs of the Archdiocese Of Newark.

Sincerely,

Anthony V. Genovese, A.I.A., NCARB
