Pro-Tec Contracting Corp.
50 Williams Parkway
East Hanover, New Jersey 07936

Project Name: Kensington Apartments
Fords, New Jersey

Project Value: \$240,000

To Whom It May Concern:

We are the Engineering and Construction Management firm for an energy efficiency upgrade project for a seventeen building residential complex in Fords, New Jersey.

Bright Power provides practical energy management and solar energy solutions that save building owners energy, money and time. We focus on multifamily residential buildings, enabling them to reduce waste, improve cash flow, achieve energy law compliance and make building occupants more comfortable. Clients include building owners, management companies, developers, contractors, architects, governments and utility companies.

Bright Power's Design & Implementation group prides itself on maintaining high standards of quality and workmanship, and we are known for being especially rigorous in holding our subcontractors to these standards, and verifying them with thorough inspections.

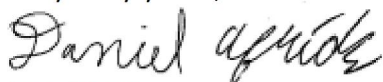

We have contracted with Pro-Tec Contracting to perform exterior vent and sealant replacement, construction and installation of new attic hatches, as well as some interior air sealant work.

All the work performed by Pro-Tec was completed in accordance with the project specifications and has been approved. Furthermore, Pro-Tec crews and management were proactive in their approach to this project, and their work was excellently performed, with a level of professionalism and skill that is rare in our industry.

It was a pleasure doing business with Pro-tec, and we look forward to working with them again on future projects.

Please feel free to contact us should you require additional information about our project with Pro-Tec.

Very truly yours,

Dan Africk
